

KEDAR P

9611006609 | kedarpcse2024@gmail.com | <https://www.linkedin.com/in/kedar-p-034900278/>

OBJECTIVE

Enthusiastic and motivated Computer Science graduate with a solid foundation in software development and a passion for problem-solving. Experienced in front end web development with proficiency in Javascript, python, and web technologies. Eager to contribute strong analytical skills and technical expertise to a dynamic team in a software engineering role.

EDUCATION

TheOxfordCollegeof Engineering, Bengaluru, India - BE, CSE - CGPA:7	2024
Vidya Jyothi PU, College, Kolar, India - 12 th – 80%	2020
Navachethana Vidya Samasthe, India - 10 th - 87.84%	2018

SKILLS

Technical Skills	Html, Css, Javascript,Reactjs
Soft Skills	Communciation ,Team work,
Tools	Vscode,

PROJECTS

Pharmacy Management System (group project)

Objective: Developed a user-friendly pharmacy management application that enables pharmacist to browse ,feed and retrieve data of customers and and their order history

Took data of medicines from Kaggle used streamlit for frontend

Key features : gives the feature of retrieving, adding history of order of the customer

Technologies used : Streamlit for front end python and mysql for backend

Currency converter : <https://kedar5045.github.io/currency-converter/>

Build a converter which converts from one country currency to another the given value is changed to another currency value

Used fetch api concept the currency values are took from api

The converter gets current currency values using api and flags are also changed using api

Key features: gives the currency value of any country

Technologies used : html css and javascript

Internships

completed internship in cevi (centre for excellence in visual intelligence) ,learned about creating character in blender , basics of gen ai and docker. got insights about google collab setting up of project in google collab understood importance of version dependency for projects

Experience

Junior Software Engineer

Pheonix Solutions 8 months :

1. Texthub Project

Collaborated with the Tech Lead to design and implement a **phishing URL detection feature** using a RabbitMQ worker script, enabling asynchronous communication with external phishing detection services to improve security and system efficiency

Integrated background processing workflows to handle URL verification tasks reliably, ensuring scalable and non-blocking request handling.

Identified and resolved multiple application bugs, including implementing dynamic page titles across all webpages to improve usability and SEO consistency..

Enhanced the login page user experience by retaining user credentials after invalid login attempts, reducing friction and improving overall usability.

2. Digital Highway Project

Technologies: React.js, Material-UI, React Flow

Developed a secure **Sign-In page** using React.js with form validation and session management to ensure authenticated user access. Designed responsive layouts optimized for mobile and tablet devices to enhance cross-device usability.

Designed and implemented reusable **dialog components** and a structured **DataGrid page** for efficient data presentation, sorting, and interaction.

Integrated **React Flow** components into the webpage to visualize dynamic workflows.

Implemented a responsive **hamburger menu and sidebar navigation** to enhance mobile usability and provide seamless navigation across different screen sizes.

Designed and integrated an interactive React Flow canvas to support drag-and-drop diagram creation.

Built reusable confirmation dialog boxes across multiple pages to maintain UI consistency and prevent accidental destructive actions..

Enhanced map interactivity by integrating marker click events that trigger zoom-in behavior, improving overall user experience and usability.

3.United Groove -Admin panel

Contributed to the development of the **United Grooves Admin Panel**, designing and implementing scalable backend features to streamline administrative workflows.

Built and maintained **Admin Management APIs** (Create, Update, List) with proper validation, structured error handling, and optimized data processing.

Implemented secure **user authentication and role-based access control (RBAC)** to ensure protected access to sensitive administrative functionalities.

Developed the complete **Instructor Management module**, supporting Add, View, Edit, and Delete operations with clean API architecture.

Integrated frontend and backend using **GraphQL queries and mutations**, improving data efficiency and reducing unnecessary API calls.

Designed reusable confirmation dialog components across multiple pages to enhance user experience, maintain consistency, and prevent accidental destructive actions.

Hobbies:

Watching movies

Reading books

listening music

playing games

Extra curricular activites:

Actively participated in social service initiatives organized by **Parivarthan Groups**, contributing to youth-focused community development activities and awareness programs.

Volunteered in social outreach programs conducted in Hoskote as part of **AICTE community** engagement activities, spreading awareness about the importance of education and encouraging children to pursue consistent schooling.

Engaged with local communities to educate families about the long-term benefits of education for personal growth and career opportunities.

Conducted awareness campaigns promoting environmental cleanliness and sustainable practices, highlighting their direct impact on public health and overall community well-being.

Contributed to organizing and coordinating community interaction sessions to foster social responsibility and active participation among youth.
